The cost of everything that I have listed ,plus the other items association with the carpet cleaning would be around \$33000.00 excluding the Van.

The listing price for my asking price for the items come to about \$5545.00. If this is bought as a complete package I let it all go for \$4750.00 excluding the van should you want the van with everything already installed I will take the package deal of everything and the van \$5600.00. I was going to use the van for carrying drying equipment, next week is when I was going to start removing everything from the van.

Just let me know also I had added more items that I feel is just collecting dust around here.

Thanks
David
